Hickory, N. C.

Fruit Prices on Back Cover

Guarantee

The Howard-Hickory Co. exercises the greatest care possible to keep its varieties true, and holds itself in readiness to reship any trees or plants that may prove otherwise, or refund the original sum of money paid therefor, if reported to it within five years from date of order. It is mutually agreed that it is not further responsible in any case.

The Howard-Hickory Co. agrees to resupply at half price, f. o. b. shipping point, trees and plants sold at the within-named prices that may die within one year from date of shipment from causes other than abuse or neglect, provided the account is paid promptly, and if the item is then in stock; if not, credit of like amount to be allowed on any other stock selected to take its place.

When you have us do the planting, for which there is an extra charge, any plants that die from causes other than abuse or neglect the first season will be resupplied FREE, or credited on new selection, f. o. b. Nursery, provided the original account was paid promptly.

Azalea hinodigiri.
Azalea macranthus.
Euonymus japonicus microphyllus.
Hypericum calycinum.
Pachysandra terminalis (groundcover).
Yucca filamentosa.

Broad-leaved Evergreens ought to be used freely around our homes. No class of shrubs is better adapted to foundation plantings, for groups at the entrance, or curves in the driveway, or for massing in front of taller cone-bearing evergreens. We would like to see a group of Broad-leaves around every southern home.

To make America more fruitful and beautiful should be the ambition of every loyal Southerner. It can be done if you will help. It does not mean that you must spend a lot of money, but it does mean that you should have some fruit trees and berries in your home garden; that your house be made cooler in summer by some shade trees, and that a few flowering shrubs give color from spring to fall. A little from every one makes a beautiful town for all.

T signifies plants that can be used in tubs, urns, boxes, etc.

S signifies that the plant is usually used as a specimen.

M signifies that the variety is often used for mass planting around foundation, in corners of the lawn, etc.

It is to be remembered, however, that either or all may be used in combination in landscape work. Junipers and Retinosporas can be kept to almost any desired size or shape by judicious pruning. Thujas (Arborvitaes) can be pruned sparingly.
